

# COPPER CANYON CONSULTING

*Forest Engineering & Project Management*

**COPPER CANYON CONSULTING LTD.** is a forest engineering firm based out of Crofton, on the southeast shore of Vancouver Island. Established in 2008, we continuously provide services to a core group of clients, as well as complete projects for small tenure owners, property developers, mining and utilities companies, and private land holders.

We are currently seeking a **Project Forest Engineer** to complement our team. The successful applicant will be expected to manage projects, assist with the supervision of engineering crews, complete block layout, and prepare block packages to meet client specifications. Applicants must demonstrate the following requirements:

- Project management with an emphasis on forest engineering and timber development
- Minimum of 5 years of direct forest engineering experience, including crew supervision
- Experience preparing prescriptions for harvesting operations and compiling block packages
- Experience evaluating timber and completing block proformas
- Working knowledge of GPS, Roadeng, mapping software, and Lidar
- Must be well organized, physically fit, have good communication skills and be self-motivated
- Excellent work references
- A valid BC driving license

We provide a supportive and team-oriented work environment, with the common goal to meet and exceed our clients' expectations.

If you believe you meet the requirements of this position please email your cover letter and resume, in confidence, to [careers@coppercanyon.ca](mailto:careers@coppercanyon.ca).
