"THE GRAVEL EXPERTS"

JMB Crushing Systems was founded in the late 1970's. JMB's President, Jeff Buck, purchased the company from his father over 30 years ago and has been serving Alberta industries ever since. Starting with one piece of hauling equipment, today JMB has a fleet in excess of 100 units and one of the most experienced work forces in Northeast Alberta. JMB produces and supplies aggregates for leading oilfield companies, industrial projects, and road construction throughout Alberta. JMB maintains a significant inventory of aggregate for immediate distribution, holding one of the largest supplies of aggregates in Alberta spread over 25 locations.

Working in the Aggregate Resource Division out of the Edmonton office, the **Aggregate Resource Planner** will provide environmental permitting coverage for JMB Crushing Systems aggregate projects. This will include fieldwork to support the permitting and operation of JMB aggregate resources in the province of Alberta.

Job Description:

- Develop and implement environmental, operational, and technical plans including technical report writing for internal needs and external permitting submissions.
- Prepare, submit, and manage environmental applications to different regulatory agencies.
- Work with external stakeholders on the permitting and implementation of aggregate projects. (Federal, Provincial, Municipal, local, and site stakeholders)
- Work with operations in the development and operation of aggregate resources.
- Field work includes, but is not limited to, biophysical site assessments, pit inspections, environmental audits, reclamation assessments, reclamation monitoring, quantification reporting, and GPS mapping.
- Receive and process basic land use administration requests.
- Work with external environmental consultants on providing highly disciplined project deliverables.
- Provide basic GIS mapping for internal and external needs.

Ideal Experience:

- Planning or permitting of natural resource projects: 2 years (Required)
- Strong working knowledge and experience with Alberta sand and gravel permitting and regulatory requirements.
- Working knowledge and experience with sand and gravel operations.
- Technical report writing experience.
- Three (3) or more years of gravel pit planning experience, including associated field work.
- Experience with using GIS mapping software and GPS systems.

Minimum Qualifications:

- Possess a degree or a diploma from a recognized environmental sciences level university or college program.
- Be a member in good standing with a related Alberta environmental professional association or have the qualifications to become a member.
- Two (2) years work experience in the planning or permitting for natural resource projects (Sand & Gravel, Oil & Gas, Forestry) in western Canada.
- A valid drivers license.

Application closing date: Friday, May 3, 2019

JMB offers competitive wages, benefits and full-time permanent employment.
