

EXCELLENT PEOPLE MAKE EXCELLENT BUSINESS

Norbord is the leading global OSB manufacturer. Our success comes from hiring skilled and talented team members in all areas of our business. We are dedicated to developing and retaining a strong and committed workforce that ensures we remain at the front of manufacturing excellence. At Norbord we are committed to teamwork and safety without compromise. We are currently seeking an exceptional individual for the following vacancy:

MECHANICAL TEAM LEADER – HIGH LEVEL, ALBERTA

Reporting to the Maintenance Manager, the Mechanical Team Leader is a front-line leadership position responsible for managing labour requirements and maintenance (preventive, predictive and unscheduled) of all mill equipment and machinery. This position leads maintenance teams with a strong emphasis on safety, quality and efficiency. The Maintenance Team Leader relies on leadership abilities, in conjunction with a continuous improvement / preventive maintenance mindset in order to support and promote excellence as established in the Company vision, mission and values. Responsibilities include but are not limited to:

- Planning work priorities for both day shift and shift tradesmen in conjunction with the production work teams.
- The ability to facilitate the development, implementation and continuous improvement of our Standard Operating Procedures by educating, training, monitoring, and proactively coaching team members.
- Participating in the development of the department budget and long-term budgeting and planning.
- Identifying potential causes of accidents, completing safety / housekeeping inspections, and resolving individual and team issues.
- Promoting mutual collaboration with operational personnel is an important consideration of this position.

The ideal candidate will have 5+ years of manufacturing experience as a Journeyman Millwright, Electrician, HD Mechanic or Machinist, with 1-2 years of supervisory experience. Excellent working knowledge of an industrial environment and strong interpersonal and communication skills are necessary. Hydraulic knowledge and additional trade's experience are assets. You should have a demonstrated knowledge of team processes and the ability to model, encourage and influence team behavior and decision making. Proficiency of Microsoft Office is considered an asset.

Interested applicants should send their letter of application and current resume to:
