

Terra Sense Analytics

UAV / RPAS / Drone Pilot

Terra Sense Analytics is an Okanagan-based company using remote sensing technologies to innovate in the natural resources sector. Using our fleet of UAV aircraft and 3D computer renders, our cross-functional team is building datasets and servicing contracts for multiple clients across BC.

We are looking for an experienced UAV pilot to join the team in a temporary position, with the possibility of permanent work for the right candidate, able to contribute in an off-season role.

General Role:

- Pilot in Charge of multi-rotor and fixed-wing UAS
- Lead visual observer(s) as necessary
- Work independently and within a 2-3 person field team
- Travel within BC with occasional work further afield
- Available to work away from home, weekends and holidays as required
-

Minimum Qualifications and Skills:

- 1-year minimum UAV flying experience
- RPAS Pilot Certificate – Advanced
- ROC-A
- Class 5 driving licence with clean abstract
- Strong analytical skills, organized and detail-oriented
- Able to lift equipment up to 25lbs and physically able to work in difficult terrain
- Strong computer skills including multiple software platforms and hardware integrations
- Ability to problem-solve under pressure and stay focussed on repetitive tasks
- Willing to learn
- L1 first aid minimum
- Ability to follow company SOPs
- Excellent record-keeping skills

Bonus:

- Aeronautic experience
- GIS experience
- Pix4D, DJI and Sensefly Ebee experience
- Forestry or field-based work experience

A vehicle will be provided for field work. Training and equipment will be provided. Please look at our website for further information about the company.

Reply with resume and a convincing email to david@terrasense.ca

Thanks for your interest. Only those candidates selected for interview will be contacted.

Wage: \$18-20 / hour depending on experience
