

Forest Technicians / Timber Cruisers / GIS Technician

Live Crown Forestry Ltd. is an established and growing forestry resource management consulting firm providing multiphase timber development services since 1995. Our office is located in Prince George. The following full time positions are available immediately with guaranteed employment until December for the successful candidates.

Forest Technicians/Layout Engineers

Candidates will be responsible for conducting timber development for harvesting operations including timber reconnaissance, forest road and block engineering and other related field duties. This position may include field crew management and coordination. Successful candidates will have experience in multiphase road and block layout. Preference will be given to those who possess a technical diploma or degree in forestry or a related discipline.

Work shifts are Monday to Friday with the option to work longer shifts. Our Salary /Compensation packages are commensurate with experience. The wage range is \$16 to \$25 per hour depending on experience and proven abilities.

Timber Cruisers

Successful candidates will have experience timber cruising in the north and central interior of BC. Work shifts are Monday to Friday with the option to work longer shifts. Our Salary /Compensation packages are commensurate with experience. The wage range is \$16 to \$25 per hour depending on experience and proven abilities.

GIS Technologist

This candidate will also act as the Occupational Health and Safety Officer and Assistant Project Coordinator. Responsibilities include the creation and maintenance of spatial data in a Geodatabase environment using ESRI ArcGIS Desktop. Working with the forestry field staff and supervisors, the candidate will manage and analyze GPS data. As Occupational Health and Safety Officer the candidate will organize, implement and maintain the company Occupational Health and Safety Program as required to maintain SAFE Companies Certification standards.

The successful candidate will have a GIS Technologist Diploma or equivalent experience with a minimum of 2 years practical experience. Candidates should be proficient with the creation, collection, and post processing methods of GPS data using ArcGIS, ArcPad, Trimble GPS receivers, and Trimble GPS Pathfinder Office. Preference will be given to individuals with formal training or experience in related fields of GIS, forestry, and geography.

Our Salary /Compensation packages are commensurate with experience. The wage range is \$16 to \$23 per hour depending on experience and proven abilities.

Please forward your resume with cover letter in confidence to the following address. In the cover letter please state the position(s) for which you are applying. Only candidates requested for personal interviews will be contacted.
