

Natural Resource Forester / Analyst

Sewall is a national GIS, forestry, and engineering consulting firm headquartered in Old Town, Maine in its 128th year of business. Information can be obtained at <http://www.sewall.com/>. Currently, we are seeking a motivated and self-directed individual to perform forestry and natural resource analysis. This is an opportunity for the right candidate to be a part of our growing Forestry and Natural Resources group.

This position is intentionally being advertised with a range of qualifications, as we have flexibility relative to the range of skills that will best compliment our current team. The successful candidate will bring between 2 to 5+ years of experience in forestry and/or natural resources field in the northeastern United States. The position will require a demonstrated background in communications, research and analytical skills, and ability to function independently. The duties will entail resource analysis, GIS, map generation, forest management and planning for timber and non-timber objectives, and web-site maintenance. Position requires travel and field work. Candidates must have a Bachelor's degree in forestry, environmental science, or a related field with demonstrated proficiency in GIS skills. A background or experience in forest recreation planning and wildlife management is preferred. Salary, title and position level will be commensurate with demonstrated abilities, education and experience.

Sewall offers a competitive salary and benefits package. Central Maine has access to mountains and sea, a wide range of recreational activities, a state university, and a relaxed lifestyle. Interested candidates should submit a cover letter including salary history and/or requirements, and a resume outlining experience and credentials to Natural Resource Forester / Analyst, Human Resources Department, Sewall, P.O. Box 433, Old Town, Maine 04468, or personnel@sewall.com. No calls please.

Sewall Company is an Equal Employment/Affirmative Action Employer.
