

GIS Analyst/Technician Drafting Technician

SOLSTICE CANADA CORP. is an environmental consulting company specializing in soil assessment, remediation, project management, and air photo interpretation for the upstream oil and gas industry. Solstice has been growing and currently has approximately 20 employees, consisting of environmental professionals and support staff. Our professionals have backgrounds in soil science, forestry, biology, ecology, safety management, and land use planning.

This is an opportunity to enjoy your work, your coworkers, have a balanced life style and help the environment. Bring your top-notch skills and concern for the environment to work for Solstice Canada Corp. Competitive salary and benefits, profit sharing and company daycare available.

We are looking for someone who:

- Appreciates a more informal working environment and doesn't mind if there is a dog accompanying their owner to work.
- Likes working in a hectic but supportive environment.
- Has proven office management and supervisory experience.

You will be working with the various project leads as well other GIS and AutoCAD staff, producing maps, editing and managing geodatabases, writing scripts, and offer efficient mapping solutions.

Duties include:

- Creating/editing maps for Solstice reports
- Managing Geodatabases and preparing for delivery to client
- Scripting and programming.
- Willing to share skills/knowledge with other GIS Specialists

Salary is negotiable and will be commensurate with experience. See www.solsticecanada.com for the posting, job description and more information about Solstice.
