CONTROLLER
Engineered Wood Products Manufacturer – BC Interior

A dynamic, growth oriented manufacturer of engineered wood products has an opportunity for a multi-faceted Controller to assist driving its continuous improvement process. This is much more than a Controller role as the company is seeking an experienced business person with a financial background to help take them to the next level.

This business is a division of a larger Group and the role represents an enormous opportunity to play a key role in ongoing development and growth of this important part of British Columbia’s growing value-added / engineered wood products industry sector.

The Controller will oversee all aspects of the financial management of the operating company as well as integration with the parent company including the monitoring and compliance with all legal and regulatory issues. Working with Division President and the parent company, the incumbent will develop financial strategies; formulate and manage capital requests; manage the budgeting processes; establish and implement policies, goals, objectives and procedures in alignment with corporate values and guidelines.

Candidate should have a recognized accounting designation; post-secondary education in finance or business administration; and progressively responsible experience for a manufacturing company. While not essential for consideration, it is preferred candidates have experience in costing and inventory control in wood products manufacturing operations; and HR and HR systems experience in a union environment.

The remuneration package reflects the importance of this senior career opportunity.

Note: A more detailed position outline is available upon request.
